

PR120H

Production of High Quality Dry Ice Pellets

The fully automatic PR120H is an efficient pelletizer designed to consistently produce high quality dry ice pellets using liquid CO₂ and electrical power. The PR120H is differentiated by its reduced cost and high quality output. With minimal space requirements, the PR120H can produce up to 120kg/ 265lbs of dry ice pellets per hour. It provides the best conversion factor on the market = 10% better than traditional pelletizers. Producing dry ice on demand has never been easier!

Unique Features:

- Stainless steel enclosure reduces noise level below 75 db(A) and protects machine components
- Fully automated, one-button operation
- Panel PC with built-in 7" touch screen
- Heat exchanger minimizes CO₂ waste
- Quick startup reduces downtime and loss of valuable CO₂
- Compact footprint
- Free choice of die plates:
mm: 3, 10, 16
in: 1/8, 3/8, 5/8

Benefits of Dry Ice Production:

- Produce fresh, high quality dry ice on demand
- Reduce wasted dry ice due to sublimation
- Eliminate transportation costs
- Low ownership and maintenance costs

Floor Characteristics and Minimum Clearance Distances

The pelletizer must be placed on a horizontal concrete floor with an adequate load-carrying capacity. The floor must be free of cracks and structural deficiencies. The minimum clearance distances must be observed to provide sufficient space for opening the cabinet doors and servicing the pelletizer.

Installation

The installation of the pelletizer must be carried out by one of Cold Jet's service technicians or by a technician approved by Cold Jet.
